

AirGorilla's PCO/UV N-DUCT™

Whole House Air Cleaner

Two, 36 watt, Dual-Radiant Lamps

Provides over 5 times the killing power of the typical, single 12" UV lamp.

No Maintenance

The titanium dioxide grid never needs cleaning or replacing.

Ease of Installation

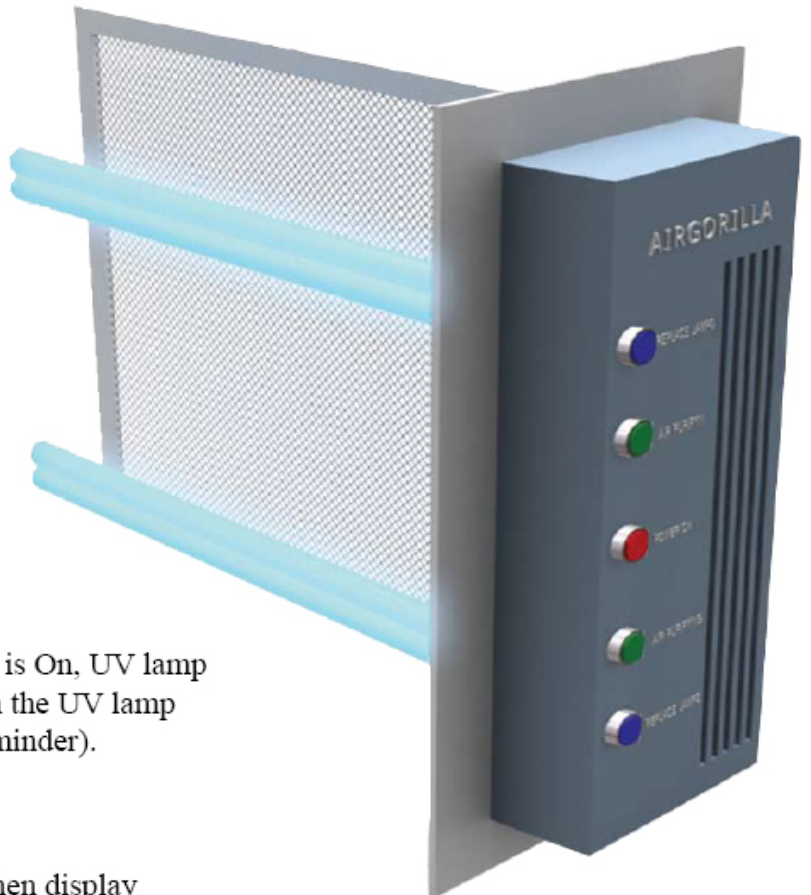

Cut just one hole - 5" x 11" and install in the supply or return duct.

Operational LED's

Advanced electronics that let you know Power is On, UV lamp is on and working, and most importantly, when the UV lamp needs to be replaced (along with an audible reminder).

Safe

Kill switch disconnects power when display panel door is open.

Photocatalytic Oxidation (PCO) Filter

187 square inches of nano-technology titanium dioxide mesh produces maximum destruction of airborne pathogens and reduction of harmful VOCs and associated odors.

Lamp Replacement is a Snap

Don't have to unscrew or unfasten unit to replace lamps - simply open the cover and pull out old lamps - insert new ones.
